TECHNICAL SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, C++, C#, React, React Native, Next.js, Node.js

Data & AI/ML: SQL, Supabase, Retrieval-Augmented Generation (RAG), LangChain, LlamaIndex, Pinecone

Tools: Git, Linux, Firebase, Oracle, MySQL, PostgreSQL

EXPERIENCE

Software Developer

Dasens AI

Calgary, AB

May 2025 – Present

- Launched two **AI SaaS platforms (SmartSRED, InventGenie)** serving **10+ business clients**; reduced SR&ED claim prep time by **40%** and built **RAG-based patent drafting engine**.
- Designed and shipped **React/Next.js dashboards** backed by **Supabase**, improving client data access and onboarding speed (**2 min setup**).
- Developed **custom n8n integrations** with LinkedIn + Airtable; cut manual outreach by **15+ hrs/week** and increased demo conversion by **25%**.
- Implemented **secure backend services** with Supabase (row-level security, role-based auth), enabling rapid feature rollouts with zero downtime.

Technical Analyst

Ntyam Active Care

Calgary, AB

Jan – Apr 2024; Sep – Dec 2024

- Deployed a **web portal** (HTML/CSS/JS, Firebase) that enabled online scheduling and reduced manual booking calls by **30%**.
- Architected and optimized a **PostgreSQL database** to centralize client records, improving query latency by **60%** and ensuring high data accuracy.
- Built a **React Native mobile app** (Android/iOS) adopted by **200+ active clients**, streamlining appointment tracking and service access.

RESEARCH

Research Assistant (Prof. Peter Zizler)

Mount Royal University

Calgary, AB

Sep 2024 – Present

- Applied **SVD** and **PCA** to **50k+ NBA/MLB game records**, reducing feature space from 30 to 5 components while retaining **80% variance**.
- Built **predictive models** and interactive visualizations (NumPy/Pandas/Matplotlib) to analyze team efficiency and player clustering.
- Presented findings at **YYCDATACON 2025** and the **International Conference on Statistics and Data Science (SFU)**.

PROJECTS

PowerlifterPro

Solo Project

Calgary, AB

Jul 2025 – Present

- Developed a **cross-platform app** for powerlifters to log lifts, track progress, and receive **AI-driven programming recommendations**.
- Implemented **RPE-based autoregulation** with a **Node.js + PostgreSQL backend**, delivering personalized training load suggestions.

CxC Data Hackathon | Markov Chains, ML

University of Waterloo Data Science Club

Waterloo, ON

Feb 2025

- Built a **recommendation engine** using **Markov chains + ML**, achieving **70% top-N accuracy**, and delivered insights via a **Streamlit dashboard**.

EDUCATION

BMath (Hons.) Computational Mathematics, Statistics (Co-op Program)

University of Waterloo

Waterloo, ON

Sep 2022 – Present

- Focused on **algorithms, numerical methods, and statistical modeling**, completing projects such as a **C compiler in Bash** and predictive regression models in **R**.

Intermediate PostgreSQL Certificate

University of Michigan

Calgary, AB

Nov 2024

- Mastered **stored procedures, query optimization, and regex filtering** for large-scale normalized databases.
